

ANUOLUWAPO VICTOR

Software Developer | React • TypeScript • Node.js • Express.js

Lagos, Nigeria | +234 816 775 1906 | anuluwa2051@gmail.com | Portfolio | GitHub | LinkedIn

SUMMARY

Computer Science graduate and Software Developer with hands-on experience building web applications and REST APIs using **TypeScript, JavaScript, React, Next.js, Node.js, Express.js, and PostgreSQL**. Experienced in responsive production interfaces, API and payment integrations, database-backed CRUD functionality, authentication, and debugging application and integration issues. Contributed to fintech and business applications across internships, contract roles, and distributed development teams, with growing full-stack experience across frontend and backend development.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL

Frontend: React.js, Next.js, Tailwind CSS, Material UI, Mantine UI

Backend & APIs: Node.js, Express.js, REST APIs, Prisma ORM, Webhooks

Databases & Integrations: PostgreSQL, MySQL, Supabase, Paystack, Stripe

State & Data: React Query, Zustand, React Context API, URL & Session State

Testing & Tools: Jest, React Testing Library, Postman, API Testing, Browser DevTools, Git, GitHub, Figma, Vercel

EXPERIENCE

Backend Development Intern | Decode Labs

Aug 2026 - Present | Remote | Internship

- Build backend applications with **Node.js and Express.js**, applying routing, middleware, validation, REST API design, and structured error handling.
- Developed **PostgreSQL/Prisma CRUD and JWT authentication APIs** with persistent storage, Argon2 password hashing, protected routes, duplicate prevention, and reusable middleware.
- Integrated a **third-party weather API with Axios**, implementing environment-based configuration, response transformation, timeout/error handling, and Postman-tested API flows.

Frontend Developer | Olarvo Ltd

Jul 2026 - Present | Remote | Contract

- Develop production features in an existing **Next.js, React, and TypeScript** monorepo, translating Figma designs into responsive admin and customer-facing interfaces.
- Built a multi-step booking flow with forms, calendar scheduling, guest management, **Stripe and Paystack payments, REST API integration, React Query, and URL/session state**.
- Shipped and maintained **8+ application views and 25+ components/features**, including searchable/filterable tables and pagination, while diagnosing API, CORS, hydration, state, and integration issues.

Technical Support Specialist | OnePipe

Mar 2026 - Present | Remote

- Onboarded **50+ merchants** onto an embedded finance platform within two months, supporting technical requirements and API integrations while achieving a **60% activation rate**.
- Diagnosed and resolved **375+ API and platform issues** with a two-hour average turnaround, collaborating with engineers on root-cause resolution and reducing engineering escalations by **60%**.

Software Engineer Intern - Cortex 3.0 | OnePipe

Nov 2025 - Feb 2026 | Remote | Internship

- Built and documented **Oxyhome**, a fintech installment-payment web application, translating payment requirements into frontend workflows and application logic.
- Worked with PayWithAccount concepts including bank-account linking, mandate authorization, recurring debit flows, webhooks, and settlement states.

Frontend Developer | Travo Africa

Oct 2025 - Jan 2026 | Part-time, Remote

- Implemented Leaflet-based location detection and interactive map functionality within a multi-person frontend team, improving map performance and geocoding behaviour.
- Translated Figma designs into **4 responsive production pages and 7+ reusable components** across customer-facing and administrative interfaces.

SELECTED PROJECTS

Backend Development Projects - Decode Labs | Node.js • Express.js • PostgreSQL • Prisma ORM • JWT

- Built a progression of backend APIs covering REST fundamentals, PostgreSQL/Prisma CRUD, Argon2/JWT authentication and protected routes, and third-party API integration with Axios, with validation, middleware, error handling, and Postman testing throughout.

Apex Merchant Ledger | Next.js 15 • TypeScript • Zustand • Supabase • Chart.js • Paystack

- Built a real-time fintech settlement application for transaction and cash-flow tracking, with Paystack payment flows, webhook-driven updates, Supabase Row Level Security, and interactive Chart.js analytics.

EDUCATION

BSc Computer Science | Babcock University CGPA: 4.46/5.00 | Jan 2021 - Jul 2025
