

ANUOLUWAPO VICTOR

Frontend Developer — TypeScript / React / Next.js

+2348167751906 | anuoluwa2051@gmail.com | anuvictor.vercel.app | github.com/A-n-u-O

SUMMARY

Frontend Developer specializing in TypeScript, React, and Next.js, building scalable, API-integrated web applications with Jest/RTL coverage and Zustand state management. Shipped payment infrastructure (PayWithAccount APIs, webhook orchestration) during a fintech engineering internship, and separately onboarded 50+ merchants while resolving 375+ support tickets, cutting escalations by 60%. Pursuing Google Professional Cloud Developer certification.

SKILLS

Languages & Core Web: TypeScript, JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: React.js, Next.js 15, Tailwind CSS, Leaflet, Framer Motion, Mantine UI, Material UI

Testing: Jest, React Testing Library (RTL), API Testing

State Management: Zustand, React Context API

Backend & APIs: Node.js, Express.js, REST APIs, Webhooks, Open Banking APIs, Supabase, PostgreSQL, MySQL, Paystack

Tooling & Platforms: Git, GitHub, npm/Yarn, Vercel, Figma, VS Code, Agile/Scrum

EXPERIENCE

OnePipe — Lagos, Nigeria · Remote

Customer Support Agent

Mar 2026 – Present

- Onboarded 50 merchants onto an embedded finance platform in 2 months, driving a 60% activation rate through hands-on technical requirements gathering and API integration support.
- Resolved 375 REST API and platform support tickets at a 2-hour average turnaround, cutting engineering escalations by 60% through direct root-cause collaboration.
- Led 10 consultative merchant engagements to evaluate product fit; feedback directly informed 6 shipped product improvements.

Software Engineer Intern — Cortex 3.0

Nov 2025 – Feb 2026

- Built and documented Oxyhome, a fintech installment-payment web application, end-to-end during the Cortex 3.0 accelerator.
- Designed recurring debit architecture on PayWithAccount APIs (bank account linking, mandate authorization) and modeled webhook-driven settlement lifecycle logic and a state-based customer dashboard.

Freelance Frontend Developer | Self-Employed

Jun 2024 – Present

- Delivered 2 production web applications (React, Next.js, TypeScript) on 5-day average build cycles, earning repeat client engagement.
- Integrated RESTful APIs and third-party services (Paystack, Supabase, WhatsApp Business API), applying Zustand state management and Jest/RTL test coverage across multi-feature client apps.

Frontend Developer | Travo Africa · Part-time, Remote

Oct 2025 – Jan 2026

- Implemented Leaflet-based user location detection and interactive map display features as part of a multi-person frontend team, improving map load performance and geocoding accuracy.
- Converted Figma designs into 4 responsive, production-ready pages and 7+ reusable components across user-facing and admin dashboard interfaces.

IT Support Specialist | Polaris Bank Ltd. · Full-time

Oct 2025 – Jan 2026

- Managed and troubleshooted network infrastructure and internal systems for banking staff, resolving issues that were delaying day-to-day operations.
- Prepared and maintained core banking application environments for staff use while supporting compliance adherence across internal teams.

PROJECTS

Apex Merchant Ledger — Next.js 15, TypeScript, Zustand, Supabase, Chart.js, Paystack

- Built a real-time fintech settlement dashboard automating transaction and cashflow tracking to remove manual reconciliation; validated with test users.
- Integrated Paystack payment flows with secure webhook handling for real-time transaction state updates; enforced multi-tenant data isolation via Supabase Row Level Security and built interactive Chart.js analytics.

[Live Demo](#) | [GitHub](#)

Mini-Commerce — Next.js, TypeScript, Zustand, Tailwind CSS

- Built an e-commerce prototype with Zustand-persisted cart state, preventing session data loss across page navigations; achieved a 100/100 Lighthouse Performance score (1.2s LCP, 0 CLS) and 100/100 on SEO and Best Practices.

[Live Demo](#) | [GitHub](#)

HR Management System — React, TypeScript, Tailwind CSS, Material UI

- Architected a role-based HR dashboard (employee management, attendance, payroll) with a scalable, SOLID-principle component structure and full cross-browser compatibility.
